Professional experience

- **Full-stack Developer - Freelance (Certified)**
  Softlabs Colombia SAS

  2024/01 - PRESENT
  Cartagena, Colombia

  Full-Stack Developer, working on the design and construction of scalable business solutions. Mostly oriented to Web Technologies and the digitalization of businesses. I highlight having designed and implemented a web-service (a demonized Backend API application) in charge of acting as a bridge to connect a client's ERP Software with their new choice of electronic invoicing provider. Developed in Typescript and deployed as a single executable taking advantage of one of the latest cutting-edge features of NodeJS, I am talking about SEA (Single Executable Applications), it also had a dashboard developed in React. I was also in charge of developing several other Frontend projects (a results consultation portal for clinical laboratory patients, and a web application for inventory management and filling of gas cylinders, the latter used by important companies in the sector on the Caribbean coast).

- **Full-stack Developer**
  VTEX, freelance.

  2021/11 - 2022/10
  Remote, Cartagena, Colombia

  Developer of a web-based live sales management application (plugin), using React with Typescript, NodeJS, AWS services, Bootstrap+CSS and the Web Sockets Protocol.

- **Full-stack Developer**
  Independent professional

  2021/06 - 2021/11
  Remote, Cartagena, Colombia

  Frontend web development, and collaboration for the migration of ERP program to web technologies (React, Typescript, Bootstrap) using ElectronJS.

Education
